Proficiencies

Frameworks/Libraries	Languages	Applications
React, React-Redux, Cucumber.js, WebdriverIO, Node JS, MySQL, Bootstrap, jQuery	Javascript, Typescript, C#, Python, Gherkin, HTML, CSS	Visual Studio Code, Cypress, Postman, Jira, Azure DevOps Microsoft Office Suite, Teams, Slack, Adobe Indesign, AVID

Latest Projects (this and others available to view on my website)

Titanic Timeline Explorer   In Progress
- Ongoing project allowing users a top down view of the decks of the RMS Titanic. It gives the visitor the ability to select different times over the course of the sinking and will correspondingly show where certain passengers/crewmembers were along with their first-hand account of what was happening.
- Utilized (so far): React/React Hooks, React-Bootstrap, Javascript, CSS, Material-UI

Author Website
- Designed a single page application to advertise a trilogy of books. This project required an accessible, straightforward design but I strived to infuse it with themes from the books without it being overwhelming.
- Utilized: React/React Hooks, Javascript, CSS, Material-UI, TypwriterJS

Family History Website
- Built a website that houses the family history of a customer. Complete with an interactive image gallery, family tree display, and dozens of biographies.
- Utilized: React/React Hooks, React-Bootstrap, Javascript, CSS, Material-UI

Professional Experience

CloudNine (Ediscovery Automation)   Nov 2021-Current
QA Test Automation Engineer   Remote
- Solely responsible for the planning, writing, updating. and maintaining of automated test suites for a variety of web and desktop-based products, most from the ground up.
- Collaborated with developers and project managers to assess various products testing needs.
- Reported, tracked, and verified fixes for dozens of bugs and defects in JIRA.
- Utilized Behavior Driven Development (BDD) with Cucumber to develop scenarios, features, and step definitions.
- Transitioned and refined existing test suites from WebdriverIO to Cypress.
- Assisted development and product team with the building and execution of automated smoke and regression testing for product releases.
- Ran and e-mailed weekly build verification test and their reports for multiple products.
- Participated in daily stand-up meetings with various product teams.

Emuna Mini LTD. (Proguard)   April 2014-Nov 2021
Manager   Houston, Texas

- Maintained computers and software for seven properties over the Houston area.
- Designed signage, mapping, and documentation standards for company wide use.
- Provided technical and process support for a dozen+ employees with various levels of experience and backgrounds.
- Explained, negotiated, organized, and executed hundreds of rental leases each year to a wide variety of customers.
- Organized and executed storage auctions for hundreds of past due accounts.
- Collected hundreds of thousands of dollars in back due accounts by making calls, sending letters, and negotiating payment plans.

Education

DigitalCrafts	**University of Houston–Downtown**
Full Stack Web Development	Professional Writing, *Summa Cum Laude*
Certificate conferred 2020	Bachelors of Science conferred 2017
